PRESS RELEASE – November 09

SES IS APPOINTED BY SEAVIEW

Ships Electronics Services (SES), one of the UK's leading suppliers and service agents for the commercial and leisure marine industry, has been appointed by SeaView Europe as the exclusive UK distributor of its Radar and Communications mounting brackets.

SeaView is the largest manufacturer of mounting brackets in the world. The company provides a full range of mounts for all types and brands of antennas, domes and night vision cameras, which in turn supply the heart of a ships communication and navigation systems.

Commenting on the appointment, SES Managing Director, Stephen Roper said, "One of the most critical systems on a ship or yacht has to be navigation and communications and without the associated antennas, domes and cameras being secure, none of this will function. We have therefore looked long and hard at the various options available to ensure when we fit a system for a customer, they can rest assured that this area is totally secure whatever the weather and sea will throw at it. SeaView is one of the longest established and most respected companies in the business so we are delighted to be able to offer this exclusive distributorship to our customers."

Over the past years SES has gained an enviable reputation for its exceptional customer service in the supply, installation and service of the most trustworthy and tested brands in marina electronics.
